

Parofen
(Paracetamol & Ibuprofen)
Tablets

COMPOSITION:

Each tablet contains:

Paracetamol 500 mg

Ibuprofen 400 mg

PROPERTIES:

* Parofen tab is a combination of two well effective, safe agents (Ibuprofen and Paracetamol)

* **Paracetamol** is an effective antipyretic, analgesic with mild anti-inflammatory properties

* **Ibuprofen** is a non steroidal anti inflammatory, which possesses strong analgesic and antipyretic activities.

Combining between these two agents, which act by two different mechanisms, result in a dual effect in the treatment of pain and fever.

INDICATIONS:

“All febrile conditions as analgesic, antipyretic.

Relief of mild to moderate pain such as: headache, toothache, postoperative and musculo skeletal pain.

Potent analgesic for influenza and common cold.

CONTRAINDICATIONS:

* Parofen is contraindicated in patients with asthma, peptic ulcers and hepatic dysfunction.

* Hypersensitivity to any of its ingredients.

PRECAUTIONS:

- **Pregnancy, this medication should be used only when clearly needed during the first 6 months of pregnancy. Use of Parofen during late pregnancy should be avoided. Discuss the risks and benefits with your doctor.**

As with other drugs excreted in milk, Parofen is not recommended for use in nursing mothers.

SIDE EFFECTS:

* **Parofen tab.** is generally well tolerated, adverse events when observed are usually mild and transient in rare cases may cause nausea, vomiting, dyspepsia, skin rashes and hepatic disturbances.

DOSAGE and ADMINISTRATION:

‘One tablet three times daily

N.B: **Parofen tab** is not recommended for children below 12 years old

STORAGE:

Keep at room temperature (25 °C). **Keep** out of reach of children

PRESENTATION:

Pack contains 3 strips **Each strip contains** 10 tablets,
